The Fall 2020 semester at the University of Notre Dame will soon conclude. While this term tasks holds great saliency, we invite you to celebrate this milestone as well. You have journeyed these weeks through unanticipated and often arduous paths, and you've done so with grace, patience, a love for one another, and a commitment to excellence. Procedures should not be understated. However, while diligent completion of all end-of-semester tasks is undoubtedly regarded as the most distinguished academic term of recent memory, we recognize the journey and the growth you have undergone during your time here.

The experimental Winter Session is a suite of engaging opportunities between the end of the Fall 2020 semester in mid-November and the beginning of the Spring 2021 semester on February 3, 2021. Continue to explore Winter Session series, and you can register now by 3 PM on Thursday, Nov. 5 | 4 PM-5:15 PM Virtual Webinar: Exploring Winter Session

From Thursday, Nov. 5 through Jan. 31, 2021, students will not only take new Computer Applications courses for credit but will also have the option to specialize in cross-disciplinary concentrations such as Social and Environmental Sustainability, Research and Entrepreneurship, or Arts, Technology, and Society.

We invite you to celebrate this milestone as well. You have been remarkable in the ways you've supported one another and in the work you've accomplished, despite all the challenges you've faced. We are excited to feature Engineering Summer Abroad with a presentation to be announced on November 12. The Experimental Winter Session continues to plan for Summer 2021, and we encourage you to continue exploring these opportunities!

In order to help you prepare for Spring course registration on December 9th, your First Year Advisor is excited to feature Engineering Summer Abroad with a presentation to be announced on November 12. The Experimental Winter Session continues to plan for Summer 2021, and we encourage you to continue exploring these opportunities!
